SKILLS

Programming Languages & Concepts: C, C++, Python, OOPS

Data Manipulation and Analysis: SQL, NumPY, Pandas

Cloud Platform & Services: Azure, Azure Databricks, Azure Data Factory

Data Integration: ETL/ELT (ADF)

Automation & DevOps: Ansible

Data Visualization: Matplotlib

Version Control: Git, GitHub

PROJECTS

Automated File Processing Pipeline

- Built an automated Azure Data Factory pipeline to process, filter, transform, and save incoming files efficiently, ensuring seamless data flow and minimal manual intervention.

Olympic Data Analytics

- Engineered an automated ETL pipeline using Azure Data Factory and Databricks to process historical Olympic data.
- Implemented PySpark transformations and loaded the clean data into a SQL data warehouse for analytics

INTERNSHIPS

Data Science Intern, ReGex Software

09/2025

- Applied PySpark for complex data transformations and advanced SQL for querying and data modeling as part of an intensive training program

Data Engineering Intern, Infovate Systems

08/2025

- Developed an end-to-end internal data pipeline using Azure Data Factory for orchestration and Azure Databricks for processing.

EDUCATION

B.Tech. (Computer Science and Engg.), Global Institute Of Technology

2021 – 2025

7.7 CGPA

Jaipur, Rajasthan

Higher Secondary Education (RBSE), Shiv Bal Niketan

2021

89%

Jaipur, Rajasthan

CERTIFICATES

- Deloitte Australia Technology Job Simulation on Forage
- AWS Cloud Practitioner Essentials
- HackerRank 5-Star Gold Badge in SQL
